

MACCHINE LAVORAZIONE LEGNO - WOODWORKING MACHINERY

Forty years experience, leader in the production of traditional woodworking machines.

The production is managed internally, allowing to run every type of work, from the machines in series to the customized ones. The supervising of each step guarantees the good functioning of machines and all details are well cared.

D515

SIMPLICITY IS ITS STRENGTH

Simplicity is its strength: machine solid and robust, equipped with solid cast-iron supports that guarantee, also in heavy situations, the absence of vibrations for an optimal finish of the woodwork.

CENTRAL PISTON IN CAST IRON

The large cast-iron piston for lifting of the flat thickness doesn't require any maintenance. With the mechanical block on the front, it guarantees solidity and ease of use.

SANDBLASTED ROLLER OUTPUT

The sandblasted roller output ensures a perfect towing on any type of material.

SPIRAL 3 PLANER SHAFT

ASPIRATION HOOD

The extractor hood, incorporated in the machine bonnet, ensures an optimal extraction of the planed material.

MACHINE HOOD

The hood, when opening completely, makes all maintenance operations, cleaning and substitution of knives, very simple, comfortable and fast.

FOUR FEED SPEED OF THICKNESS ROLLERS

The four feed speeds of thickness rollers are ideal for any type of working. The manual lever change, on the front of the machine, makes speed variation operations easier.

ROLLERS ON THE THICKNESS

The thickness plane can be accessorised with 2 adjustable rollers, to guarantee a towing safe even in the worst working conditions.
